

GMB Audit Report

Business Name: absent

Impact: Business name is essential for GMB ranking as it helps Google identify and match your business in local searches. Missing or incorrect names can significantly reduce visibility.

Category: absent

Impact: Category selection directly affects which searches your business appears in. Missing categories mean you won't rank for relevant local searches, reducing discoverability.

Rating: absent

Impact: Ratings are a major ranking factor for GMB. Higher ratings improve visibility in local pack results and increase click-through rates. Missing ratings indicate low engagement.

Total Reviews: absent

Impact: Review quantity and recency are key ranking factors. More reviews signal authority and trustworthiness to Google, improving local pack positioning.

Address: absent

Impact: Complete address information is critical for local ranking. Missing addresses prevent your business from appearing in "near me" searches and map results.

Website: absent

Impact: A verified website link strengthens your GMB profile's authority and provides additional ranking signals. Missing websites reduce trust and local search visibility.

Phone: absent

Impact: Phone number consistency across platforms (NAP - Name, Address, Phone) is crucial for local SEO. Missing or inconsistent phone numbers can hurt ranking and confuse Google's algorithm.

Establishment Date: absent

Impact: While not a direct ranking factor, establishment date adds credibility and can help in competitive markets. Older businesses may receive slight preference in local rankings.

Description: absent

Impact: Business descriptions help Google understand your services and improve keyword relevance. Missing descriptions reduce your ability to rank for relevant search terms.

Products: absent

Impact: Product/service listings help Google understand your offerings and match you to relevant searches. Missing products reduce visibility for specific service-based queries.

Total Updates: absent

Impact: Regular posts and updates signal an active business to Google. Businesses with frequent updates tend to rank higher as they demonstrate engagement and relevance.
